

ICT-enabled Energy Efficiency in European Social Housing E3SoHo Final European Workshop 18th September 2013 – Brussels

The E3SoHo final European Workshop will take place in Brussels the framework of the CECODHAS Housing Europe Executive Committee and Working Groups Meetings. E3SoHo is a European ICT-PSP project, coordinated by ACCIONA Infraestructuras, in which CECODHAS Housing Europe participated by providing a socio-economic analysis of the use of ICT in social housing.

The overall aim of the project is to implement and demonstrate in 3 Social Housing pilots (in Spain, Italy and Poland) an integrated and replicable ICT-based solution which aims to bring a significant reduction of energy consumption in European social housing by providing tenants with feedbacks on their energy consumption and by offering them personalized and targeted advice.

The results of the project will be presented and discussed together during the workshop with other European projects working on ICT for Energy Efficiency in Social Housing. The targeted audience of will be composed by high-level representatives from Social Housing Organizations members of CECODHAS Housing Europe as well as other relevant stakeholders and EC representatives. To find out more about the E3SoHo Project, please visit www.e3soho.eu.

VENUE

Fondation Universitaire - 11, Rue d'Egmont, 1000 Bruxelles.
